Appl. Comput. Math. V.20, N.3, 2021, pp. 436-437

APPRECIATION FROM THE EDITORS

On behalf of the Applied and Computational Mathematics an International Journal we would like to thank all, members of the Editorial Board and referees whose work contributed to the continued strengthening of the journal during 2017-2021. This period was very successful one for ACM. Impact Factor of Applied and Computational Mathematics for 2020 has increased from 2.354 to 3.898. The five-year impact factor, a longer term measure of the impact of authors research, also increased to 2.752. The journal now ranks 10th out of 265 in the Mathematics and Applied category.

We received well over 1431 new submissions and have been published nearly 124 articles. Acceptance rate was nearly 8.7%. Without the help of many mathematicians who volunteered their time and expertise to referee manuscripts for ACM, it would be impossible for us to maintain the high standards so necessary to bring the journal to this level of recognized eminence. We appreciate their continued support enormously. Thank you from the bottom of our hearts! The full list of all 146 referees who contributed to the journal since 2017, is also available from the ACM webpage at: http://acmij.az.

Once again we extend our appreciation to the all authors, reviewers, editors, editorial staff and readers who continue to support the journal and of course all those who have been citing ACM in their work.
